Rohan Mittal

Software Developer

Delhi NCR | +91 9711267177

Github | LinkedIn | mittalrohan1112@gmail.com

PROFILE SUMMARY

- A Versatile Developer, proficient in a wide range of technologies including Full Stack Web Development Development in MERN Stack and more, with hands-on experience as an intern. Demonstrated expertise in integrating advanced features like real-time data visualization and user authentication, showcasing adaptability to various project requirements.
- Equipped with strong analytical abilities, as evidenced by the development of a chrome browser extension for email phishing detection using machine learning techniques. This project reflects a deep understanding of data preprocessing, model training, and the application of regression algorithms for practical problem-solving.

WORK EXPERIENCE

Growtech Solutions| *React Developer Intern* *May'23 - Jun'23*
- Developed a React based application aimed at helping people know about ITRs and saving taxes via connecting with CAs.
- Integrated real-time data visualization and analysis features using Firebase's Realtime Database, enabling users to interact with CA and lawyer professionals
- Implemented user authentication using Firebase Firestore, ensuring secure access to the application's features.
- Collaborated within an Agile lifecycle model, contributing to iterative development and continuous improvement processes.

SKILLS

TECHNICAL: JavaScript | Python | HTML | CSS | SDLC | React | Database
SOFT: Communication Skills | Adaptable | Inquisitive | Time Management | Leadership

PROJECTS

[Link] Portfolio Website
- Developed a responsive web application to showcase my portfolio.
- Tried to keep it simple and clean for better understanding
- Implemented responsive design principles to ensure optimal viewing experience across various devices and screen sizes.

[Link] Playify-[Music App]
- Tech stack: HTML, CSS, JavaScript.
- Designed an engaging shopify clone application to showcase the skills
- Implemented form validation using JavaScript for user input integrity.

[Link] Project - E-Commerce Application
- Website is functional however in this it's just showcasing the skills so it's partial functional yet but i can make it full functional.
- Developed an E-commerce application with a responsive frontend.
- Utilized CSS and Javascript for better functioning and window changing
- will Implement robust user authentication with login and signup pages.
